SUMMARY

Highly motivated and detail-oriented MCA graduate with hands-on experience in Python full-stack development. Proficient in Python, Java, and C, with a strong foundation in DBMS, data analysis, and software development. Demonstrated ability to build end-to-end applications including an AI-based mental health detection system. Passionate about creating scalable software solutions and eager to contribute to innovative technology projects as a Software Developer.

EDUCATION

MCA (MASTER OF COMPUTER APPLICATIONS) Graduating May 2026 Jawaharlal Nehru Technological University - Gurajada, Vizianagaram 8.1 GPA

Avanthi Institute of Engineering & Technology (JNTU-GV), Vizianagaram

Relevant coursework: Programming Languages, Data Structures and Algorithms, Operating Systems, DBMS, Software Engineering, Artificial Intelligence, Machine Learning

BSC-MEC'S (BACHELOR OF SCIENCE) Graduating March 2024 Andhra University -Visakhapatnam 7.1 GPA

Sree kasyap degree college (AU), Visakhapatnam

TECHNICAL SKILLS

DB and OS: MYSQL, Windows

Programming: Python, C, Java

Tools & Software: VS Code, MS Office, Excel, Git

Concepts: OOP, Data Structures, Machine Learning (basics)

Certifications: Python for Data Science – NPTEL | Python Using AI – AI For Techies | Artificial Intelligence-Internship Studios

Python Web Developer Intern – DATAPRO

INTERNSHIP | Datapro, Visakhapatnam: Python Web Development Intern

March 2023 – July 2023

- Completed a structured internship focused on Python as a web developer, covering core web development concepts.
- Gained practical experience building and deploying Python-based web applications.
- Worked with NumPy for data manipulation and array operations as part of the training curriculum.

Internship Studio, Online: Artificial Intelligence

December 2025 – February 2026

- Developed a small project for Face Recognition System using PCA and ANN.
- An efficient Biometric identification system that utilizes principal component analysis (**PCA**) for dimensionality reduction and artificial neural networks (**ANN**) for high accuracy facial classification

ACADEMIC PROJECTS | Diabetic: Diabetic Eye Disease Detection System

- Developed an AI-based system using Deep Neural Networks to automatically detect and classify diabetic eye diseases (Diabetic Retinopathy, Cataract, DME, and Glaucoma) from retinal fundus images.
- Achieved 98% accuracy with EfficientNetB0 by implementing data preprocessing, augmentation, and transfer learning.
- built a Django web application for real-time image upload and disease prediction.
- **AI-POWERED SMART CLASSROOM MONITORING AND ATTENDANCE SYSTEM USING FACE RECOGNITION**

- Developed an AI-powered classroom management system using computer vision to automate attendance through real-time multi-face recognition and database matching.
- Integrated behavioural analysis features to monitor classroom engagement, specifically detecting student inattentiveness and unauthorized mobile phone usage.
- Implemented an automated alert module that cross-references class timetables to notify faculty of upcoming sessions and alert authorities in cases of absence.

ACHIEVEMENTS

Technical Achievements

- Lead Organizer, Tech Explorer Quiz | Avensis 2026 Spearheaded the planning and execution of a large-scale technical quiz competition, managing logistics and content for participants.
- Technical Participant | Avanthi Engineering College Actively competed in various technical events and workshops, demonstrating a commitment to continuous learning and peer engagement

Leadership and Extra Curricular Activities

- Student Coordinator | Avensis Served as a primary organizer for college-wide events, streamlining communication between faculty and the student body to ensure successful event delivery.
- Master of Ceremonies (Host) | MCA Freshers' Party Orchestrated and hosted the official welcome event for the Master of Computer Applications department at Avanthi College
